IE TRANSACTIONS

Volume 14 1982

Author Index

Titles are given under first author; all other authors are cross-referenced to first author. Numbers in parentheses are issue number and first page number. (No. 1 is March, No. 2 is June, No. 3 is September, and No. 4 is December.)

AHMADI-MARANDI, S. (No. 3, 24). See Wilhelm.
ALLEN, PATRICK D. (No. 4, 296). Potential Military Applications of Two-Phase Sampling (with Rasey).
ALTIOK, TAYFUR (No. 2, 125). A Note on Transfer Lines with Unreliable Machines, Random Processing Times, and Finite Buffers (with Stidham).
ARCELUS, F. J. (No. 2, 90). Optimal Production Run for a Normally Distributed Quality Characteristic Exhibiting Non-Negative Shifts in Process Mean and Variance (with Banerjee and Chandra).
AXSATER, SVEN (No. 2, 128). A Note on Scheduling in a Semi-Ordered Flow Shop without Intermediate Queues.

BALLOU, DONALD P. (No. 4, 257). See Fisk.
BANERJEE, P. K. (No. 2, 90). See Arcelus.
BEDWORTH, DAVID D. (No. 3, 150). See Kang.
BLACKSTONE, JOHN H., Jr. (No. 1, 60). See Hogg.

CARLSON, ROBERT C. (No. 2, 99). See Jucker.
CHAFFIN, DON B. (No. 4, 272). See Garg.
CHANDRA, RAMESH (No. 2, 90). See Arcelus.
CLAYTON, EDWARD R. (No. 4, 282). A Goal Programming Approach to the Optimization of Multi-Response Simulation Models. (With Weber and B. W. Taylor).
COHEN, STEPHEN B. (No. 2, 135). Modeling and Forecasting Time Series Using Transfer Function and Intervention Methods.

DAS, BIMAN (No. 1, 27). Effect of Production Feedback and Standards on Worker Productivity in a Repetitive Production Task.
DAS, BIMAN (No. 3, 193). Effect of Production Feedback and Standards on Worker Satisfaction and Job Attitudes in a Repetitive Production Task.
DORI, DOV (No. 1, 19). See Pliskin.
DREZNER, ZVI (No. 4, 243). Fast Algorithms for the Round Trip Location Problem.

EVANS, GERALD W. (No. 3, 183). Multiobjective Energy Generation Under Uncertainty (with Morin and Moskowitz).

FISK, JOHN C. (No. 4, 257). Production Lot Sizing Under a Learning Effect (with Ballou).
FREIVALDS, ANDRIS (No. 4, 272). See Garg
FRIEDEL, D. C. (No. 1, 38). See Vasko.

GARG, ARUN (No. 4, 272). Biomechanical Stresses from Manual Load Lifting: A Static vs Dynamic Evaluation (with Chaffin and Freivalds).
GOLD, BELA (No. 4, 227). Practical Productivity Analysis for Management: Part I. Analytic Framework.
GREENBERG, IRWIN (No. 2, 131). A Rectifying Inspection Scheme with Misclassification Probabilities.
GUNAWARDANE, GAMINI (No. 2, 137). A Note on the Facility Phase-In Problem.

HANSEN, DON R. (No. 4, 288). Optimal Production Strategies for Identical Production Lines with Minimum Operable Production Rates (with S. G. Taylor).
HODGSON, THOM J. (No. 3, 175). A Combined Approach to the Pallet Loading Problem.
HODGSON, T. J. (No. 1, 44). Production Lot Sizing with Material Handling Cost Considerations (with Lowe).
HOGG, GARY L. (No. 1, 60). A Simulation Model for Assessment of Large-Scale Power System Reliability (with Blackstone and Patton).

JOHNSTON, ROBERT G. (No. 3, 214). See Rothkopf.
JUCKER, JAMES V. (No. 2, 94). The Simultaneous Determination of Plant and Leased Warehouse Capacities for a Firm Facing Uncertain Demand in Several Regions (with Carlson and Kropp).

KANG, CHIN-SHENG ALAN (No. 3, 156). Automatic

Identification of Autoregressive Integrated Moving Average Time Series (with Bedworth and Rollier).
KARNI, REUVEN (No. 4, 249). A Heuristic Algorithm for the Multi-Item Lot Sizing Problem with Capacity Constraints (with Roll).
KNOTT, KENNETH (No. 1, 11). An Analysis of the Effect of Machine-Controlled Elements Upon Incentive Payments.
KROPP, DEAN H. (No. 2, 99). See Jucker.

LAU, HON-SHIANG (No. 4, 265). The Sensitivity of Inventory Decisions to the Shape of Lead-Time Demand Distribution (with Zaki).
LIEBERMAN, R. W. (No. 3, 147). Two-Operation Crane Scheduling Problems (with Turksen).
LOWE, T. J. (No. 1, 44). See Hodgson.

MAXWELL, W. L. (No. 2, 144). Design of Automatic Guided Vehicle Systems (with Muckstadt).
MORIN, THOMAS (No. 3, 183). See Evans.
MOSKOWITZ, HERBERT (No. 3, 183). See Evans.
MUCKSTADT, J. A. (No. 2, 114). See Maxwell.
MURPHY, F. H. (No. 1, 52). Electric Utility Capacity Expansion Planning with Uncertain Load Forecasts (with Sens and Soyster).
MURTHY, D.N.P. (No. 3, 167). See Nguyen.

NGUYEN, D. G. (No. 3, 167). Optimum Burn-In Time to Minimum Cost for Products Sold Under Warranty (with Murthy).

PARKER, R. GARY (No. 1, 3). An Overview of Complexity Theory in Discrete Optimization: Part I. Concepts (with Rardin).
PARKER, R. GARY (No. 2, 83). An Overview of Complexity Theory in Discrete Optimization: Part II. Results and Implications (with Rardin).
PATTON, ALTON D. (No. 1, 60). See Hogg.
PLISKIN, JOSEPH (No. 1, 19). Ranking Alternative Warehouse Layouts: A Multiattribute Approach (with Dori).
PRITSKER, A. ALAN B. (No. 1, 70). Applications of SLAM.

RARDIN, RONALD L. (No. 1, 3) and (No. 2, 83). See Parker.
RASEY, STEPHEN M. (No. 4, 296). See Allen.
ROLL, YAKOV (No. 4, 249). See Karni.
ROLLIER, DWAYNE A. (No. 3, 156). See Kang.
ROTHKOPF, MICHAEL H. (No. 3, 214). Routine Analysis of Periodic Queues (with Johnston).

SENS, S. (No. 1, 52). See Murphy.
SOYSTER, A. L. (No. 1, 52). See Murphy.
STIDHAM, SHALER, Jr. (No. 2, 125). See Altiok.

TAYLOR, BERNARD W. M., III (No. 4, 282). See Clayton.
TAYLOR, SAM G. (No. 4, 288). See Hansen.
TUFEKCI, SULEYMAN (No. 2, 108). A Flow-Preserving Algorithm for Time/Cost Trade-off Problems.
TURKSEN, I. B. (No. 3, 147). See Lieberman.

VASKO, F. J. (No. 1, 38). A Dynamic Programming Model for Determining Continuous-Caster Configurations (with Friedel).

WEBER, WARREN (No. 4, 282). See Clayton.
WILHELM, W. E. (No. 3, 204). A Methodology to Describe Operating Characteristics of Assembly Systems (with Ahmadi-Marandi).

ZAKI, AHMED (No. 4, 265). See Lau.

Subject Index

Numbers in parentheses are issue number and page (No. 1 is March, No. 2 is June, No. 3 is September, and No. 4 is December). Note that papers are also listed by author.

0400 FACILITIES PLANNING, DESIGN

0402 Facility Location
The Simultaneous Determination of Plant and Leased Warehouse Capacities for a Firm Facing Uncertain Demand in Several Regions (No. 2, 99). James V. Jucker, Robert C. Carlson, and Dean H. Kropp.

0405 Plant Layout Analysis
Ranking Alternative Warehouse Layouts: A Multiattribute Approach (No. 1, 19). Joseph Pliskin and Dov Dori.

Production Lot Sizing with Material Handling Cost Considerations (No. 1, 44). T. J. Hodgson and T. J. Lowe.

Design of Automatic Guided Vehicle Systems (No. 2, 114). W. L. Maxwell and J. A. Muckstadt.

0500 FUNCTIONAL OPERATIONS

0501 Assembly
A Methodology to Describe Operating Characteristics of Assembly Systems (No. 3, 204). W. E. Wilhelm and S. Ahmadi-Marandi.

0600 HUMAN ENGINEERING

0602 Biomechanics
Biomechanical Stresses from Manual Load Lifting: A Static vs. Dynamic Evaluation (No. 4, 272). Arun Garg, Don B. Chaffin, and Andris Freivalds.

0604 Learning
Production Lot Sizing Under a Learning Effect (No. 4, 257). John C. Fisk and Donald P. Ballou.

0605 Motivation
An Analysis of the Effect of Machine-Controlled Elements Upon Incentive Payments (No. 1, 11). Kenneth Knott.

Effect of Production Feedback and Standards on Worker Productivity in a Repetitive Production Task (No. 1, 27). Biman Das.

Effects of Production Feedback and Standards on Worker Satisfaction and Job Attitudes in a Repetitive Production Task (No. 3, 193). Biman Das.

0700 INCENTIVE PLANS

0703 Special Types
An Analysis of the Effect of Machine-Controlled Elements Upon Incentive Payments (No. 1, 11). Kenneth Knott.

0900 INDUSTRIES

0904 Manufacturing
A Dynamic Programming Model for Determining Caster Configurations (No. 1, 38). F. J. Vasko and D. C. Friedel.

0905 Transportation, Distribution
Fast Algorithm for the Round Trip Location Problem (No. 4, 243). Zvi Drezner.

1000 Management

1003 Decision Making
A Flow-Preserving Algorithm for Time/Cost Trade-off Problems (No. 2, 109). Suleyman Tufekci.

Multiobjective Energy Generation Under Uncertainty (No. 3, 183). Gerald W. Evans, Thomas L. Morin, and Herbert Moskowitz.

1008 Controls
Practical Productivity Analysis for Management: Part I. Analytic Framework (No. 4, 227). Bela Gold.

1100 MATERIAL HANDLING

1101 Containers, Unit Loads
A Combined Approach to the Pallet Loading Problem (No. 3, 175). Thom J. Hodgson.

1104 Cranes, Hoists
Two-Operation Crane Scheduling Problems (No. 3, 147). R. W. Lieberman and I. B. Turksen.

1106 Industrial Trucks
Design of Automatic Guided Vehicle Systems (No. 2, 114). W. L. Maxwell and J. A. Muckstadt.

1200 METHODS ENGINEERING

1201 Automation, Mechanization
Design of Automatic Guided Vehicle Systems (No. 2, 114). W. L. Maxwell and J. A. Muckstadt.

1203 Energy Conservation
Electric Utility Capacity Expansion Planning with Uncertain Load Forecasts (No. 1, 52). F. H. Murphy, S. Sens, and A. L. Soyster.

A Simulation Model for Assessment of Large-Scale Power System Reliability (No. 1, 60). Gary L. Hogg, John H. Blackstone, Jr., and Alton D. Patton.

Multiobjective Energy Generation Under Uncertainty (No. 3, 183). Gerald W. Evans, Thomas L. Morin, and Herbert Moskowitz.

1300 QUANTITATIVE METHODS

1301 Mathematical Models
An Overview of Complexity Theory in Discrete Optimization: Part I. Concepts (No. 1, 3). R. Gary Parker and Ronald L. Rardin.

An Overview of Complexity Theory in Discrete Optimization: Part II. Results and Implications (No. 2, 83). R. Gary Parker and Ronald L. Rardin.

The Simultaneous Determination of Plant and Leased Warehouse Capacities for a Firm Facing Uncertain Demand in Several Regions (No. 2, 99). James V. Jucker, Robert C. Carlson, and Dean H. Kropp.

1302 Networks
A Flow-Preserving Algorithm for Time/Cost Trade-Off Problems (No. 2, 109). Suleyman Tufekci.

1303 Programming, Linear, Nonlinear

A Dynamic Programming Model for Determining Continuous Caster Configurations (No. 1, 38). F. J. Vasko and D. C. Friedel.

Electric Utility Capacity Expansion Planning with Uncertain Load Forecasts (No. 1, 52). F. H. Murphy, S. Sens, and A. L. Soyster.

A Note on Scheduling in a Semi-Ordered Flow Shop without Intermediate Queues (No. 2, 128). Sven Axsater.

A Note on the Facility Phase-In Problem (No. 2, 137). Gamini Gunawardane.

A Goal Programming Approach to the Optimization of Multi-Response Simulation Models (No. 4, 282). Edward R. Clayton, Warren Weber, and Bernard W. Taylor, III.

1305 Simulation/Games
A Simulation Model for Assessment of Large-Scale Power System Reliability (No. 1, 60). Gary L. Hogg, John H. Blackstone, Jr., and Alton D. Patton.

Applications of SLAM (No. 1, 70). A. Alan B. Pritsker.

A Goal Programming Approach to the Optimization of Multi-Response Simulation Models (No. 4, 282). Edward R. Clayton, Warren Weber, and Bernard W. Taylor, III.

1306 Applied Probability
Optimal Production Run for a Normally Distributed Quality Characteristic Exhibiting Non-Negative Shifts in Process Mean and Variance (No. 2, 90). F. J. Arcelus, P. K. Banerjee, and Ramesh Chandra.

A Note On Transfer Lines with Unreliable Machines, Random Processing Times, and Finite Buffers (No. 2, 125). Tayfur Altiok and Shaler Stidham, Jr.

Modeling and Forecasting Time Series Using Transfer Function and Intervention Methods (No. 2, 135). Stephen B. Cohen.

Automatic Identification of Autoregressive Integrated Moving Average Time Series (No. 3, 156). Chin-Sheng Alan Kang, David D. Bedworth, and Dwayne A. Rollier.

Optimal Burn-In Time to Minimize Cost for Products Sold Under Warranty (No. 3, 167). D. G. Nguyen and D.N.P. Murthy.

Routine Analysis of Periodic Queues (No. 3, 214). Michael H. Rothkopf and Robert G. Johnston.

1400 PRODUCTION AND INVENTORY CONTROL

1403 Inventory Control

The Sensitivity of Inventory Decisions to the Shape of Lead Time Demand Distribution (No. 4, 265). Hon-Shiang Lau and Ahmed Zaki.

1404 Materials Management

A Combined Approach to the Pallet Loading Problem (No. 3, 175). Thom J. Hodgson.

1406 Production Planning

An Overview of Complexity Theory in Discrete Optimization: Part I. Concepts (No. 1, 3). R. Gary Parker and Ronald L. Rardin.

A Dynamic Programming Model for Determining Continuous-Caster Configurations (No. 1, 38). F. J. Vasko and D. C. Friedel.

An Overview of Complexity Theory in Discrete Optimization: Part II. Results and Implications (No. 2, 83). R. Gary Parker and Ronald L. Rardin.

A Heuristic Algorithm for the Multi-Item Lot-Sizing Problem with Capacity Constraints (No. 4, 249). Reuven Karni and Yaakov Roll.

Production Lot Sizing Under a Learning Effect (No. 4, 257). John C. Fisk and Donald P. Ballou.

Optimal Production Strategies for Identical Production Lines with Minimum Operable Production Rates (No. 4, 288). Don R. Hansen and Sam G. Taylor.

1407 Production Scheduling

Production Lot Sizing with Material Handling Cost Considerations (No. 1, 44). T. J. Hodgson and T. J. Lowe.

Optimal Production Run for a Normally Distributed Quality Characteristic Exhibiting Non-Negative Shifts in Process Mean and Variance (No. 2, 90). F. J. Arcelus, P. K. Banerjee, and Ramesh Chandra.

A Note on Scheduling in a Semi-Ordered Flow Shop without Intermediate Queues (No. 2, 128). Sven Axsater.

A Methodology to Describe Operating Characteristics of Assembly Systems (No. 3, 204). W. E. Wilhelm and S. Ahmadi-Marandi.

1500 QUALITY CONTROL

1504 Sampling

A Rectifying Inspection Scheme with Misclassification Probabilities (No. 2, 131). Irwin Greenberg.

Potential Military Applications of Two-Phase Sampling (No. 4, 296). Patrick D. Allen and Stephen M. Rasey.

Guest Reviewers

For this fourteenth volume of the *TRANSACTIONS* it once more behooves me on behalf of the entire Institute of Industrial Engineers and the community that it serves to acknowledge the assistance of the people named below in reviewing manuscripts. I would also like to thank those of you not listed here who have performed unrecorded reviewing help, formally or informally. It is the responsive concern of the industrial engineering community which enables us to maintain the journal according to its standards.

Gene Woolsey
Editor, *IIE TRANSACTIONS*

Jane Ammons, Georgia Institute of Technology
M. M. Ayoub , Texas Tech University

Haresh C. Bahl, SUNY Buffalo
Sanford Baum, University of Utah
James C. Bean, University of Michigan
David Bedworth, Arizona State University
William L. Berry, Indiana University
W. Bialas, Cornell University
William E. Biles, Louisiana State University
John Birge, University of Michigan
A. Bishop, Ohio State University
Gabriel Bitran, Massachusetts Institute of Technology
Lawrence Bodin, University of Maryland
Louis Boydston, University of Michigan
Yavuz A. Bozer, Systecon, Inc.
T. F. Brady, Purdue University, Westville
John Bryant, University of Cincinnati
Robert L. Bulfin, Jr., Auburn University
J. Buzzacott, University of Toronto

Barney Capehart, University of Florida
Kenneth Case, Oklahoma State University
Luc Chalmet, IIT (Belgium)
Ed Cohen, Naval Surface Weapons Systems
Gerard Cornuejols, University of Bonn (West Germany)

Ron Dembo , Yale University
John Dill, Cornell University
Bajis Dodin, University of Wisconsin, Milwaukee
A. B. Drui, University of Washington

Jack Elzenga, University of Florida

G. A. Fleischer, University of Southern California
R. D. Foley, Virginia Polytechnic Institute
Richard L. Francis, University of Florida
Robert Garfinkel, University of Tennessee
Arun Garg, University of Wisconsin, Milwaukee
P. Ghari, Virginia Polytechnic Institute
Greg Gilmore, Rockwell International

Bruce Golden, University of Maryland
R. J. Graves, University of Massachusetts, Amherst
Harvey J. Greenberg, Energy Information Administration
Donald Gross, George Washington University
David Gustafson, University of Wisconsin
R. Haessler, University of Michigan

Donald W. Hearn, University of Florida
Willy Herrolin, Catholic University of Leuven (Belgium)
Dorit Hochbaum, University of California
J. N. Hool, Auburn University
Ming Hung, Kent State University

Peter Jackson, Cornell University
L. A. Johnson, Georgia Institute of Technology

Voratas Kachitvichyanukul, The University of Iowa
Reuven Karni, Israel Institute of Technology
Mark Karwan, SUNY Buffalo
I. Norman Katz, Washington University, St. Louis
Jeff L. Kennington, Southern Methodist University
Andre Khrui, SUNY Buffalo
Del Kimbler, University of Southern Florida
Craig W. Kirkwood, Woodward-Clyde Associates
Kenneth Knott, The Pennsylvania State University
Dev Kochhar, University of Michigan

Mark Lambrect, Catholic University of Leuven (Belgium)
Kenneth Lawrence, American Telephone and Telegraph
Phillip J. Lederer, University of Virginia
W. Lesso, University of Texas, Austin
William Levinson, Bolt, Branch, & Newman
Robert Love, McMaster University

S. Maghsoodloo, Auburn University
Paul Mangiamelli, University of Rhode Island

Unny Menon, California Polytechnic State University
Pitu B. Mirchandani, Renssalear Polytechnic Institute
Joseph J. Moder, University of Miami
James G. Morris, University of Wisconsin, Madison
Herbert Moskowitz, Purdue University
C. A. Mount-Campbell, Ohio State University
Jack Muckstadt, Cornell University
Fred Murphy, U.S. Department of Energy
Richard Murphy, Optimal Decision Systems, Inc.

J. Newhardt, The Ohio State University

Lawrence M. Ostresh, Jr., University of Wyoming

C. S. Park, Auburn University
R. G. Parker, Georgia Institute of Technology
John Pearson, U.S. Department of Energy
Elizabeth A. Peck, Coca-Cola Company, Atlanta
M.S. Pinedo, Georgia Institute of Technology
L. K. Platzman, Georgia Institute of Technology
Joseph Pliskin, Boston University
Peter Mark Pruzan, University of Copenhagen (Denmark)

M. K. Rajaraman, University of Texas, Arlington
R. V. Ramani, The Pennsylvania State University
Steven Rassenti, Bell Laboratories, Denver
A. Ravindran, Oklahoma State University
James Riggs, Oregon State University
L. Ritzman, Ohio State University
Gary Roodman, SUNY Binghamton
Richard E. Rosenthal, University of Tennessee

Vinod K. Sahnay, Wayne State University
Leroy B. Schwarz, Purdue University

J. G. Shanthikumar, University of Arizona
Hanif D. Sherali, Virginia Polytechnic Institute
C. M. Shetty, Georgia Institute of Technology
E. A. Silver, The University of Calgary (Canada)
N. Singpurwaller, George Washington University
B. D. Sivazlian, University of Florida
Robert Smith, University of Michigan
